DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, 17-28 and 46-50, drawn to input/output data modification, specifically width conversion, classified in class 710, subclass 66.
 - II. Claims 29-36, drawn to network switches, classified in class 709, subclass 200.
 - III. Claims 37-40 and 41-45, drawn to media access controllers, classified in class 710, subclass 36.
2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I has separate utility such as in double data rate data access from a memory element such as RAM.

Invention II has a separate utility such as in switching elements in a LAN environment.

Invention III has a separate utility such as transferring data packets to and from network interface cards (NICs).

See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2182

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
